To the members of the Education Committee re. bill RB 5489

The Founding Fathers envisioned a system of government where children were citizens with certain inalienable rights. Rights not defined by government but by the God who created them. Among these many rights not necessarily set forth in our Constitution are the freedoms to do "Good". There are no freedoms to do "Evil". To practice chastity is good for family and society. To practice unchastity is not good for family and society, and is therefore an "Evil".

Constitution

Nowhere in our Constitution does the State have a right set forth to itself to give a child any freedom to do "Evil". Therefore it is not within the scope of the Education Committee to pass a bill nor the State Legislature to deliver such a bill to the Governor for his signature to become law. Such a law is therefore unconstitutional.

My Recommendation to the committee

My recommendation to the committee is that this bill RB5489 be rejected as an infringement on the God given rights of the child and public that it is.

Sincerely,

James F Farrell
